HOW TO EDIT THE WORD (.docx) FILES

• Open the .docx file in Microsoft Word or upload it to Google Docs (File → Open).

• Use Find & Replace (Ctrl+H / Cmd+H) to replace all [bracketed placeholders] at once — e.g. replace [Company Name] with your actual business name throughout the document.

• To add your logo: click the grey 'Insert Logo Here' box and insert your image.

• To change font colours or styles: select the text and use the Home tab formatting tools.

• Save a master copy with your details filled in — then duplicate it for each new job.

HOW TO USE THE PRICING CALCULATOR (.xlsx)

• Open in Microsoft Excel, or upload to Google Sheets via Google Drive → New → File Upload.

• Go to the 'Job Estimator' tab. Enter your numbers in the YELLOW cells.

• The GREEN cells calculate automatically — do not type in green cells.

• Your recommended quote price appears in ORANGE.

• The 'Hourly Rate Calculator' tab helps you figure out what to charge per hour.

• The 'Instructions' tab has a full plain-English guide.
